

CSD Filler Ortmann + Herbst 100 / 15 / 15

Artikelnummer: 1006

CSD Filler Ortmann + Herbst 100 / 15 / 15

Counter pressure filler Ortmann + Herbst with Zalkin screw capper for aluminium screw caps and second crowner for crown caps has been filling carbonated soft drinks and mineral water with CO₂ in glass bottles. The filler is still installed in Germany and can be inspected on side during production. The Ortmann + Herbst Hansa B filler is an "easy-to-handle and very reliable" mechanically controlled pressure filler for glass bottles. If you use nitrogen instead CO₂ you can fill also products without CO₂, like for example juice. The fill level is determined by the filling tube.

In 2018 all 100 filling valves and the product inlet pipe as well as the "product distributor" were renewed.

CSD Filler Ortmann + Herbst 100 / 15 / 15

Model: Hansa B

Type: 100 / 15 Z / 15 KK - 115

Year of manufacturing: 1995

with 100 filling valves, 15head Zalkin aluminium screw capper,
15head crown capper

Running direction: right - left

Pitch: 115 mm

Capacity: up to 38.000 bph based on 250 ml glass bottles

Working hours: 30.000 h

Electric: Siemens S 5 PLC, bottle burst: S 7

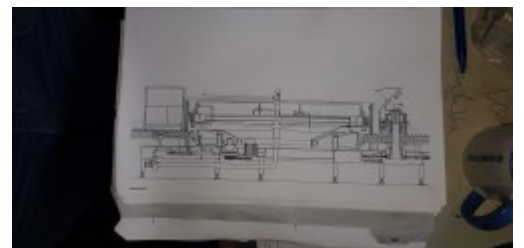

with automatic fill level control system

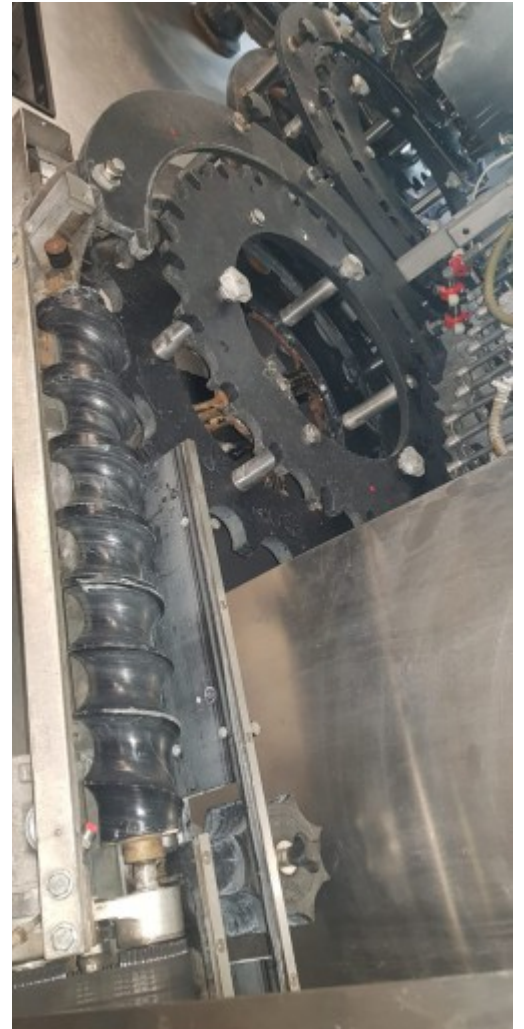

with complete safety housing around the machine

Availability: End of 2019
